

THE STAR CLEAN

Industrial sweeper, connection free

Star Clean – Innovative Industrial Sweeper by Emily

The Emily company, known for industrial cleaning solutions, introduces Star Clean, a cutting-edge sweeper designed to provide high-quality sweeping without the need for hydraulic or electrical connections. This patented system is a perfect fit for all forklift trucks and requires no additional driver training.

Key Features

- **Autonomous Operation** : The Star Clean operates by simply pushing the forklift, using wheels to activate a hydraulic system that powers the main and side brushes along with a suction turbine.
- **Dust-Free Sweeping** : With an advanced filtration system, it captures particles as small as 0.4 microns across a 10 m² surface, ensuring a clean, healthy environment.
- **Low Maintenance** : The automatic filter cleaning system requires minimal attention, with filters that can be replaced in 10 seconds without tools.
- **Compatibility** : The sweeper is designed to fit any type of forklift and can collect various types of waste.
- **Ergonomic Design** : Its compact and efficient design makes it easy to use, offering precise sweeping through a side brush mounted on a turret for maximum maneuverability.

The Star Clean represents a revolution in indoor sweeping, offering unmatched performance, ease of use, and maintenance-free operation for industrial cleaning needs.

Technical Specifications

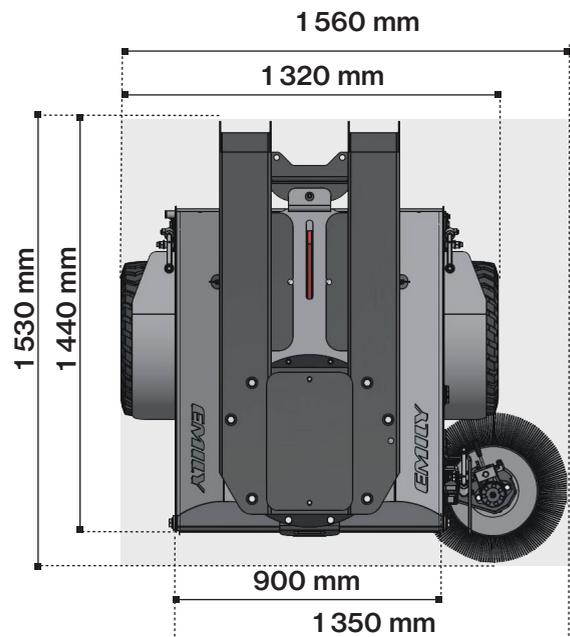

Sweeping Width : 0.90m (1.35m with side brush)

Weight : 450 kg

Capacity : 100 liters

Dimensions : 1.56 m overall width

Durable Construction : Featuring robust wheels, a heavy-duty frame, and spiral main brush.
