Notes:

1. Please obtain the actual comprehensive bearing capacity of forklift/attachment from the forklift factory.
2. The forklift truck needs to add 2 groups of oil lines.

Features:

1. Imported load keeping valves and cone sealed high-performance rubber hoses.
2. High-performance alloy steel plates for the guide rail assembly.
3. With side shift function inside.
4. Two pairs of forks can handle two pallets at one time while being separated, and can operate flexibly while being closed.

Single Double Pallet Handler Worksheet

HELI

Pallet fork handling status

① Can the fork reach the lath at the end of the pallet

Can ☐ Can't ☐

② Does the fork go in from all sides of the tray

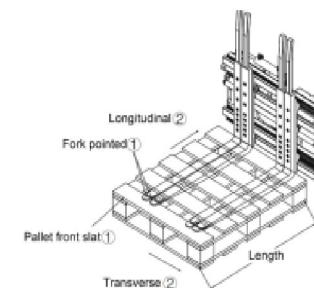

Can ☐ Can't ☐

If there are four forks

Frequency of pallet longitudinal fork operation (%)

Frequency of pallet crosswalk operation (%)

Note:Vertical refers to the direction along the length of the fork or the length of the tray,while horizontal refers to the direction across the length of the tray (see the diagram).

Pallet concern

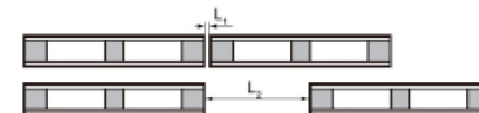

Do you need to close and separate two pallets for fork goods

Yes ☐ No ☐

If you have

Tray spacing: when two trays are closed, the inner spacing L1= _____

Tray spacing: when two trays are open, the inner spacing L2= _____

Forklift information

Forklift brand	Model	Door frame type	Maximum lift of portal frame	Bearing capacity	Cargo fork size
Cargo fork mounting class/width	Additional number of oil routes	Additional oil pressure	Additional oil flow rate	Remarks (whether twin, etc.)
